

Pikaia gracilens – 1911

Средний кембрий

Fig. 5. *Pikaia gracilens* from the Burgess Shale—decay gradient. (A) USNM 1986388, posterior part with dark stain. (B) USNM 198691, dark stain and dorsal fin partially dislocated. (C) USNM 83940b, dark stains along myomeres. (D–G) Specimens increasingly more decayed but retaining traces of the dorsal organ and myomeres. (D) ROM 61192; (E) USNM 198693; (F) ROM 61213; (G) USNM 202279. In (A) and (B) dashed lines represent those areas preserved on only the part or the counterpart. For acronyms, see Figs 2–4. Scales = 5 mm.
