Guantanamo

Paolo Pellegrin

The U.S. detention camp at Guantanamo Bay has become a controversial flashpoint of the American government's "war on terror." Magnum Photographer Paolo Pellegrin photographed the camp and its prisoners extensively in 2006. He also documented former detainees in London, Kuwait, Bahrain and Afghanistan.

"On one hand there is something very flawed about Guantanamo. On the other hand the camp has helped to generate a degree of intelligence. It is difficult to put these two things together," says Pellegrin.
