

Ксенопсихология

Статья Роберта Фрейтаса “Ксенопсихология”

This paper is the first known published reference to the “Sentience Quotient” invented by Robert A. Freitas Jr., which first defined the computational density of sentient matter along a wide spectrum spanning 120 orders of magnitude, as defined by universal physical constants. The concept was first created ca/ 1977-78 and was described in Freitas’ privately circulated but then unpublished **Xenology** (1979) manuscript.
