

# Warren Buffett's worst auto-nightmare (Hint: It's not Tesla)

A major technological shift is happening in the automotive industry. Most people are skeptical about its impact. Warren Buffett isn't one of them. He recently called it a "real threat" to one of his favorite businesses.

An executive at Ford called the technology "fantastic." The beauty for investors is that there is an easy way to ride this mega-trend. [Click here](#) to access our exclusive report on this stock.
