

4: LEFT ON GREEN ONLY

- We are not talking about only at busy intersections, but every intersection! It takes forever to get anywhere! I find myself trying to find a way to only make right turns because not only can you turn right on red, you can do it from the second right turn lane if there is one! I guess SoCal drivers cannot look and see if a car is coming from the one lane going the other way before turning left, yet they can see if a car is coming or making a u-turn if they are turning right. Confusing!
