

The cognitive domain (knowledge-based)

In the original version of the taxonomy, the cognitive domain is broken into the following six levels of objectives. In the 2001 revised edition of Bloom's taxonomy, the levels are slightly different: **Remember, Understand, Apply, Analyze, Evaluate, Create (rather than Synthesize)**.
Запоминание (remembering), понимание (understanding), применение (applying), анализ (analyzing), оценка (evaluating) и синтез (creating).
