The screenshot shows the AT&T Connect Participant Application window. The title bar reads "AT&T Connect Participant Application - Meeting - Marcelo Dorfman / MELTON's Meeting Room [Meeting Room ID - 3054747]". The menu bar includes "File", "View", "Event", "Connection", "Audio/Video", "Remote", and "Help". The toolbar contains icons for "Raise Hand", "Share Note", "Stop ...", "Webboard", "Audio", "Mute", "M. Video", and a drawing tool. A status bar at the top right shows "Meeting in Progress", "Connection: Good", and "Volume: 100%".

The main content area is titled "Getting Started" and features a sidebar with navigation links: "Mute Your Microphone", "Change Audio Device", "Invite Others", "Share an Application", "Insert / Present a Document", and "Document". The "Mute Your Microphone" section is active, displaying the following text:

### Mute Your Microphone

To mute yourself, click the mute button. You hear others, but they don't hear you. Click the Mute button again to unmute and speak.

In some events only the presenter mutes and un-mutes microphones. Your mute/unmute icon is disabled until the presenter opens your microphone.

You can also mute and un-mute telephone-based audio by pressing \*6.

If you use another voice conferencing service for telephone audio, the mute button is disabled.

Most voice conferencing services provide mute/unmute capability - check the keypad code for the service you are using.

On the right side, the "Participants" pane shows a list with columns for "Name" and "Comment". The entry "Marcelo Dorfman / MEL" is visible. Below this is a "Participants" toolbar with icons for "Mute", "Unmute", and "Volume". The "Share" pane is also visible, showing "Event Materials" and an "Insert..." button.

The bottom of the window shows the Windows taskbar with various application icons and the system tray displaying "AT&T Connect", "Internet", "Ready to Use", and the date/time "12:14 AM 17-Aug-10".
